

# GAIA GREEN ORGANICS FEEDING SCHEDULE

\*FOR DISTRIBUTION  
IN CANADA ONLY.

## PREPARATION

**Worm Castings**

5 - 15%

**All Purpose**

3 Tbsp / Gal

Blend in  
Potting Soil

### Beneficial Additions

- Glacial Rock Dust: 2 Tbsp / Gal
- Super Fly: 1 Tbsp / Gal
- Greensand: 1 Tbsp / Gal

### Pro-Tip

Wet media and let sit for 1 week before planting to fully activate biology and nutrients.

## VEGETATIVE

+ 2 Weeks

Gently  
incorporate  
1 - 2 inches

Water after  
fertilizing

**All Purpose**

2 Tbsp / Gal

### Beneficial Additions

- Feather Meal: 1 Tbsp / Gal
- Glacial Rock Dust: 1 Tbsp / Gal
- Superfly: 1 Tbsp / Gal

### Pro-Tip

Keep soil moist, but not overly wet. Minimize run-off to conserve nutrients and beneficial biology.

## FLOWERING

Every 2 weeks until 3 weeks  
before harvest

Gently  
incorporate  
1 - 2 inches

Water after  
fertilizing

**Power Bloom**

2 Tbsp / Gal

### Beneficial Additions

- Mineralized Phosphate: 1 Tbsp / Gal
- Glacial Rock Dust: 1 Tbsp/Gal
- Soluble Seaweed Extract

### Pro-Tip

With a dense root mat it can be challenging to incorporate dry fertilizers. Pre-mix Gaia fertilizers with a small amount of potting soil and apply evenly over the surface, keeping away from the stem.
